Additional Information

Driving Licence: B

Marital Status:
Single

Date of Birth:
July 1997

Languages

Turkish (Native)
English (Fluent)
Spanish (A2)

Programming Languages

C, C++, C#, Java
Python, Dart

Courses Taken

Object Oriented
Programming
Learning From Data
Artificial Intelligence
Computer Vision
Secure Programming

Hobbies

Cycling, travelling
Trekking, camping

History, architecture
Analog photography

Education

2015–2021	**Istanbul Technical University** in Computer Engineering	B.A.
2018–2020	**Anadolu University** in Securities and Capital Markets	A.A.
2011–2015	**Figen Sakallioglu** Anadolu Lisesi	High School

Internships & Work Experience

2022 Apr - Present — **Software Engineer** at **Huawei**
Developing, testing and documenting cross-platform packages such as NuGet packages for HMS Project.
nuget.org/profiles/HMSCore

Dec 2019 - Mar 2022 — **Software Developer** at **GMC Teknoloji**
Developing cross-platform mobile applications via Flutter and Xamarin C# programming languages

2019 August - Sept — **Software Development Intern** at **Siemens**
Developed .Net application as a tool to make task management easier on TFS with C# programming language

2019 April - August — **Software Development Intern** at **Poi Labs**
Android application development with Kotlin programming language and R&D in slotting optimization with Python programming language

apps.apple.com/tr/app/türkiye-futgolf/ id1556878719

Dec 2020 - Febr 2021 — **TestEt** — GMC Teknoloji
This crossplatform mobile application project is implemented in Flutter. For backend services, Firebase Functions are implemented.

July 2020 - Febr 2021 — **ParkYerimApp** — GMC Teknoloji
This crossplatform mobile application project is implemented in Flutter. For backend services, Firebase Functions are implemented.
apps.apple.com/tr/app/parkyerim-business/id1542012648

Dec 2019 - Mar 2020 — **AppyHour** — GMC Teknoloji
This crossplatform mobile application project is implemented in Xamarin, C#. For backend services, Azure functions are implemented.

2019 Sep - Dec	**RentChain**	ITU - Database Course

This project is aimed to develop a bicycle share project that is programmed with Python Flask and PostreSQL.
itucsdb1919.herokuapp.com

2019 Sep - Dec	**Face2Face**	ITU - Software Engineering Course

This project is aimed to develop a face comparison project that is programmed with Python Flask. I was responsible from UI-UX design and frontend of the webpage.

2019 August - Sept	**TFS Task Generator Improvements**	Siemens Intern

This project is aimed to upgrade TFS Task Generator application with new requirements. TFS Task Generator makes easier for employees to create tasks easier on TFS. It is implemented with WinForms, C# language as an desktop application.

2019 May	**Kickstarter**	Poi Labs Intern

This project aims learned basic concepts of android application development with Kotlin language that list the projects on Kickstarter with the detailed information.

Volunteer Experience & Memberships

2016-Present
Bilim Kahramanları Derneği
Instructor & Referee in Merak Makinesi, First Lego League and World Robot Olympiad

2015-Present
ITU Cycling Club
Board member in IT solutions

2017-Present
ITU Free Software Club
Board member in operational solutions
